

CROMWELL BALANCED FUND

► A Flexible Equity & Bond Portfolio – A One-Stop Easy-to-Implement Core Solution

At Cromwell Funds, we believe having a flexible approach to invest across equities and fixed income can help improve outcomes with potentially lower risk. The Cromwell Balanced Fund is an actively managed equity and bond portfolio with a dynamic asset allocation approach focused on outperformance over full market cycles through investments in high-quality growth mid- and large-cap companies.

► 3 Reasons to Consider the Cromwell Balanced Fund:

1. A Rare Combination of Two Seasoned Management Teams

Tran Capital Management (TCM)

- » Critical Thinking and Diversity of Perspective
- » Equity Portfolio Manager – 50–70% of the Fund's assets

Research-driven and growth-oriented, TCM places an intense focus on the true substance of companies, avoiding the distractions of investment fads and the noise of the markets. Founded in 1974, Lateef Investment Management, L.P. was the predecessor firm of TCM and was transformed following a management buyout in 2017 led by Quoc Tran, Chief Investment Officer, and Eric Winterhalter, President. TCM is majority-owned by the Managing Partners.

Aristotle Pacific Capital

- » Experienced Credit Specialists
- » Fixed Income Portfolio Manager – 30–50% of the Fund's assets

Originally founded in 2007, Aristotle Pacific Capital manages \$30 billion as of 3/31/25 and includes 20+ fixed income investment professionals who average nearly two decades of industry experience and specialize in credit investments. The team's disciplined investment process focuses on credit fundamentals for individual security selection.

2. A Flexible Allocation That Seeks to Capture Better Relative Opportunities

The Fund's allocation is based on relative opportunity and generally includes up to 70% in U.S. stocks with the remainder in fixed income. For the equity portion, the Fund is dynamically allocated to primarily growth-oriented mid- and large-caps with the remainder of the portfolio in high-quality investment-grade bonds.

3. Ease of Use

The Fund is a one-stop, easy-to-implement solution for investors. With this flexibility, we believe the Fund can serve as a easy-to-implement solution for clients seeking outperformance over full market cycles.

Effective April 30, 2025, the Cromwell Sustainable Balanced Fund was renamed the Cromwell Balanced Fund.

Investors should carefully consider the Fund's investment objectives, risks, charges and expenses before investing. For this and other information, please call 855.625.7333 or visit thecromwellfunds.com for a prospectus. Read it carefully before investing or sending money.

Mutual fund investing involves risk. Principal loss is possible. Each Sub-Advisor's use of its respective Environmental, Social, and Governance (ESG) criteria could cause the Fund to perform differently compared to funds that do not have such policies. The criteria related to this ESG framework may result in the Fund forgoing opportunities to buy certain securities when it might otherwise be advantageous to do so, or selling securities for ESG reasons when it might be otherwise disadvantageous for it to do so. There is no assurance that employing ESG and Sustainable strategies will result in more favorable investment performance. The value of debt instruments may fall when interest rates rise. Debt instruments with longer durations tend to be more sensitive to changes in interest rates, making them more volatile than debt instruments with shorter durations or floating or adjustable interest rates. The Fund invests in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods. The Fund is new with no operating history, and there can be no assurance the Fund will grow to or maintain an economically viable size, in which case the Board of Trustees may determine to liquidate the Fund.

The S&P 500 Index is a capitalization-weighted index of 500 stocks. The Bloomberg U.S. Aggregate Bond Index a broad base bond market index representing intermediate term investment grade bonds traded in the U.S. An investment cannot be made directly into an index.
