The performance data shown represents past performance. Past performance is not a guarantee of future results. Current performance may be lower or higher than the performance data quoted. The investment return and the principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. For performance information through the most recent month end please call 855.625.7333 or visit thecromwellfunds.com.

Effective on 3/7/22, AMG Managers CenterSquare Real Estate Fund, a series of AMG Funds I (the Predecessor Fund), reorganized into the Fund. Performance shown prior to 3/7/22, is that of the Predecessor Fund. The returns for Investor Class shares are the returns of the Predecessor Fund's Class N shares. Returns of the Investor Class, Institutional Class and Class Z shares reflect the returns of Classes N, I, and Z, respectively, of the Predecessor Fund. Additionally, the Fund has adopted the Financial Statements of the Predecessor Fund. Prior to 2/27/17, outstanding Class S shares of the Predecessor Fund (formerly the Predecessor Fund's sole share class, which was reclassified and redesignated as Class S on 10/1/16) were renamed Class N shares. The Predecessor Fund had the same investment objectives, strategies and portfolio management team as the Fund as of the date of the reorganization.

²Investor Class

Investors should carefully consider the Fund's investment objectives, risks, charges and expenses before investing. For this and other information, please call 855.625.7333 or visit thecromwellfunds.com for a prospectus. Read it carefully before investing or sending money.

Mutual fund investing involves risk. Principal loss is possible. The Fund is subject to special risk considerations similar to those associated with the direct ownership of real estate. Real estate valuations may be subject to factors such as changing general and local economic, financial, competitive, and environmental conditions. A greater percentage of the Fund's holdings may be focused in a smaller number of securities which may place the Fund at greater risk than a more diversified fund. Investing in initial public offerings (IPOs) is risky and the prices of stocks purchased in IPOs tend to fluctuate more widely than stocks of companies that have been publicly traded for a longer period of time. Stocks purchased in IPOs generally do not have a trading history, and information about the companies may be available for very limited periods. Market prices of investments held by the Fund may fall rapidly or unpredictably due to a variety of economic or political factors, market conditions, disasters or public health issues, or in response to events that affect particular industries or companies. Companies that are in similar industry sectors may be similarly affected by particular economic or market events; to the extent the Fund has substantial holdings within a particular sector, the risks associated with that sector increase.

Earnings per share (EPS) is a company's net profit divided by the number of common shares outstanding. The SEC yield is a standardized calculation method prescribed by the SEC and represents net income for the most recent 30-day period, which is annualized and shown as a percentage.

The FTSE Nareit All Equity REITs Index is an index of U.S. equity REITs. Constituents include all tax-qualified REITs with more than 50% of total assets in qualifying real estate assets other than mortgages secured by real property. The S&P 500 Index is a capitalization-weighted index of 500 stocks. The Dow Jones U.S. Select REIT Index measures U.S. publicly traded real estate investment trusts. Indices are unmanaged, are not available for investment and do not incur expenses.

Fund holdings and sector weightings are subject to change and should not be considered a recommendation to buy or sell any security.

The Morningstar Rating™ for funds, or “star rating,” is calculated for mutual funds with at least a 3-year history. Open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% 3-year rating for 36–59 months of total returns, 60% 5-year rating/40% 3-year rating for 60–119 months of total returns, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent 3-year period actually has the greatest impact because it is included in all three rating periods. Ratings do not take into account the effects of sales charges and loads. The Fund received 4, 3, and 4 stars for the 3-, 5-, and 10-year periods among 234, 206, and 150 Real Estate funds, respectively as of 9/30/22.
